Why Give Gifts?

People love receiving gifts.

A goal for business, big or small, is often brand recognition. One way is to get creative with your marketing. Promotional products are a simple tool that can help increase brand awareness for your business; by customizing an item that a customer can use in his or her everyday life with your logo, for instance, you're able to keep your business top of mind.

Why choose from us?

- Largest supplier of Promotional Gifts in Middle East since 1989.
 - Established Company with Excellent Track Record for Best Customer Service.
 - Large collection of items to choose from.
 - Items Ready in Stock and Large Quantities available.
 - Different Branding options to choose from.
 - All brandings done in-house with fast delivery.
 - Large production facility.
 - Competitive Prices.
- 

OUR SERVICES

Below are list of Services we offer.

Almost every product in this catalogue can be branded, Selecting the correct branding method is needed to ensure maximum exposure of your logo.

Our various in-house branding solution are explained below.

SILK SCREEN PRINTING

Screen Printing is the process whereby a logo is exposed into a mesh screen. Ink is then placed onto the screen and a squeegee pushes the ink through the screen in the areas where the logo has been imposed.

DIGITAL PRINTING

A methods of printing from a digital-based image directly to a variety of media. It usually refers to professional printing where small-run jobs from desktop publishing and other digital sources are printed using large-format and/or high-volume laser or inkjet printers.

PAD PRINTING

Pad Printing is an offset printing process that involves ink being transferred from an engraved metal plate onto a product via a Pad, creating an image on the product.

UV PRINTING

UV Printing is a form of digital printing that uses Ultra-violet lights to dry or cure the ink as it is printed. This printing method is best for branding that involves gradation effect and articles that need edge to edge printing.

HEAT TRANSFER PRINTING

A digital image is printed onto a special vinyl surface, which is then placed into the product. The product is then placed in a heat press machine, where heat will merge the vinyl and the product.

SUBLIMATION PRINTING

Sublimation Printing is a process done by way of full-colour printer which is fitted with special sublimation inks. The logo is printed onto a special transfer paper, then placed into the product where heat is applied causing the inks to migrate from paper to product.

LASER CUTTING & ENGRAVING

Sheets of polymethyl methacrylate or PMMA (also known as acrylic) have been used to replace less-durable materials like glass in many different ways. Lasers can cut through some pretty powerful stuff, even materials as hard as aluminum steels, plastic, and acrylic sheets.

METAL MARKING

A logo is etched into a product with a laser beam, replicating the logo with precise accuracy. The laser "burns" the top layer of the product off and reveals the layer beneath.

DOMING EPOXY

Doming is used to create a version of your logo by shaping a raised surface beneath the print. A mould is formed, printed and filled with epoxy which then is hardened to maintain its shape.

COMMERCIAL & INDUSTRIAL LABELS & TAGS

We do Print & Cut PVC Stickers.

ID SOLUTIONS

We have all your items needed for a ID solution. From Printing to choosing the different sizes and types of lanyards, reel badges both plastic & metal types and ID Card holders. We also do custom made lanyards.

PINS, BADGES & NAME TAGS

We have the complete package for creating pins & badges, from machines to accessories. Our high quality promotional badges are fun, yet powerful & cost effective way to put your message across to promote your business.

INDOOR SIGNS

We create Signage on both Arcylic or Aluminum, either for wall or table purposes. Signage is the design or use of signs and symbols to communicate a message to a specific group, usually for the purpose of marketing or a kind of advocacy.

AWARDS & WOODEN PLAQUES

We have a large collection of Crystal , Acrylic & Wooden Plaque. We also do custom made acrylic awards.

CUSTOM DESIGNING & MANUFACTURING

We do custom made products as what clients requests.

Flash Drives The Ideal Promotional Gifts

Flash drives make an impressive & practical corporate Gift while promoting your brand at the same time.

We are committed to be your most reliable source of USB Flash Drives in the Middle East.

We specialize in importing quality USB flash drives for promotional purposes. Our USB flash drives are sourced from reputable factories using quality components such as Samsung or Toshiba and carry a warranty against defect. We pride ourselves on high standard levels and after sales services to ensure you peace of mind when dealing with us. Our in stock

If you can't find your favorite USB in this catalogue or you need to customise a USB we can source it for you.

Reasons why you choose us as your USB flash source.

- We import original chips separately and after testing & quality checking, We fix them in USB shells.
- We never import duplicate or upgrade chips and we offer flashes with one year warranty.
- Fast delivery from ready stock.
- Big variety and range of products to select.
- Competitive prices with higher quality.
- Mock Ups and E-samples:

We have our own inhouse design facilities so we can provide you with Mock-Ups or E-virtual sample of exactly how your printed USB flash drives will look after final production. We offer our USB flash drives with latest techniques in printing options: Such as

- Full color UV printing • Screen printing • Laser engraving • Laser marking • Full color digital printing & Epoxy.

Warning

You should be aware of this before you buy any USB

What are upgrade chips?

Unfortunately some manufacturers using a lower capacity memory and selling as a higher capacity memory.

How they do it

1. They use a software to upgrade 1 GB to 4 GB. When use the chip in your computer it shows 4 GB but can't accept files more than 1 GB because the real capacity is 1 GB.
2. They use 4 pieces of 1GB chips instead of one piece of 4 GB capacity. When you save a file, more than 1 GB, it will show an error and if you save a files less than 1 GB it will be saved but when you need to re open the file, as it is not clear in which one of the chips is saved, again it will show an error.

We never use upgrade chips | We use only original chips

MADE IN ITALY

PRODUCTION IN ITALIA

FABRIQUE EN ITALIE

FABRICADO EN ITALIA

maxema®

solo una penna?
Maxema, just a pen?

Planning

Not everyone knows that it can take more than a year to create a new pen in which every detail is handled with meticulous care. Creating the moulds for each component of the pen is a highly complex operation: a mistake of even a hundredth of a millimetre could jeopardise its operation. This is why all our pens are designed and manufactured entirely in our only Italian premises, where we are able to monitor every stage: from the first prototypes right down to marketing the finished product.

Sustainability

Only a quality pen can really enhance a message, growing a brand's visibility and, why not, helping to limit the pollution of the planet. Plastics pollute: if a pen is high quality it will have a long average lifespan that will lead it to change hands more than once, so limiting the waste that comes from the immediate discarding of faulty pens. It is much better to invest in quality pens, maybe choosing to limit the quantity rather than running the risk of compromising your image and spreading the irresponsible use of plastic pens. The longer a pen's life is, the less it pollutes the environment.

Responsibility

The certificate of origin for our pens also guarantees that no child labour is involved in their manufacture, nor working conditions that do not respect workers' basic rights. We demand the same guarantee from our Italian and German raw materials suppliers. Even a pen can help to spread the culture and respect of the dignity of workers.

Design

The design of our pens is the outcome of ongoing styling research: the lines and colours are inspired by the trends of the day. A promotional pen must attract and excite, as well as being a quality support for the message it is delegated to convey. Appearance, originality, quality: everything must be perfectly balanced to make a pen worthy to carry a uniquely special company image.

Customisation

Once assembled, the pen is ready to be "dressed" with a logo or a message: our graphics office works on digital simulations to assess the possible alternatives, suggesting new proposals so that the most suitable combination can be found. Like a tailor's shop, the customer can try different sizes, colours and positions until the suit adapts perfectly to his needs. Only then does the pad or silk-screen printing stage begin, using highly resistant paints, after which the pen is finally ready to travel the world with its precious message: your image.

Quality

Attention to quality starts with the strict selection of raw materials: the plastic, refills and inner springs come exclusively from Italian or German suppliers, who guarantee their quality and reliability. The plastic for our pens comes from top quality, non-toxic ABS, which is highly resistant to knocks and sudden changes in temperature, guaranteeing excellent glossiness and high colour stability. The refills respect EU Directives for hazardous substances (2004/73/EC, 67/548/EEC and 2006/1907/EC-REACH) and the American TSCA (Toxic Substances Control Act): so all the inks are non-toxic.

Production

Our highly automated assembly lines guarantee rapid, extremely competitive manufacturing times: depending on the model, our machinery can assemble from 2,000 to 6,000 pcs per hour. Automation also means guaranteeing functionality: strict quality checks make sure that all our pens operate perfectly at each stage of their assembly.

Precision design, meticulous engineering, constant research and testing, selection of the best materials.

In short:

a love for beautiful objects and care for the environment.

This is what an Italian-made product means for Maxema.

“A significant step forward toward the use of safe plastic.”

Nature friendly

Made of non-toxic plastics, it has been **designed to have a long life** and to minimise the risk of harmful substances being released into the environment. **Using a pen for as long as possible helps to reduce pollution** and enables us to give full expression to the concept of promotion.

Green chemical

It does not contain dioxin, phthalates, bisphenol A, antimony, arsenic, barium, cadmium, chrome, mercury, lead, polybrominated biphenyls (PBBs), polybrominated diphenyl ethers (PBDEs) or deca-BDE, and **conforms to RoHS and REACH directives**.

Looking to the future

Made of plastic suitable for toy manufacture (according to European standard EN 71-03 and U.S. FDA regulations).

Antibacterial

It is made of antibacterial plastic containing a special additive which releases silver ions that prevent bacteria from colonising the surface of the pen.

LOVING
NATURE

Antibatterica,
atossica e sostenibile.

Really safe

The plastics employed **are compliant European & American FDA food contact regulations**.

CLP compliant

It is rated as non hazardous the Regulation on Classification, Labelling and Packaging.
